10. Multi-Brand Registration	32

1. Salt Registration

The Salt Registration module enables manufacturers to register, renew, amend, and maintain regulatory approval for Common Salt Manufacturing activities. The process includes application submission, document verification, site inspection, laboratory assessment where applicable, approval, certification, and post-registration compliance monitoring.

Manufacturer Registration

A manufacturer must first register with the FCAU IIMS and create a user account to access the Salt Registration services.

Once registered, the manufacturer shall complete the registration application by providing the required information and uploading the relevant supporting documents.

The required documents may include:

- Site plans
- Factory layout drawings
- Manufacturing process details
- Product information
- Product labels
- Other applicable regulatory documents

2. Application Review and Fee Assessment

FCAU officers review the submitted application and supporting documentation to verify completeness and compliance with regulatory requirements.

Following the initial review, the system generates a payment request that may include:

- Registration fees
- Other applicable fees

The manufacturer must complete the payment process before the application proceeds to the inspection stage.

3. Inspection and Assessment (DFDI)

An assigned District Food and Drug Inspector (DFDI) conducts an on-site inspection of the manufacturing facility.

During the inspection, the officer records:

- Facility observations
- Compliance findings
- Inspection remarks
- Regulatory assessment results

All inspection details are maintained within the system for subsequent review and approval.

Assign Collaborative Plant Inspection Team

Team Assignment Pending

Collaborative Inspection Team Assignment

Under revised statutory procedures, salt plant audits require a collaborative inspection team. Multiple officers can be assigned across FCAU Admin, Regional Director (RD), Medical Officer of Health (MOH), and FDI Unit Officers. The responsible Form Filler (Lead) is decided collaboratively by the inspection team during the first inspection stage. All assigned officers must sign off before the report is released for higher regulatory review.

Scheduled Inspection Date *

mm/dd/yyyy

Target field plant inspection date agreed with facility management.

Statutory Audit Remarks / Directives

e.g. Verify iodization dosing calibration and brine drainage

Optional notes visible to all inspection team officers.

Search & Add Regulatory Officers

Select multiple officers across FDI, MOH, RD, and FCAU roles by typing their name.

Include all districts (outside Colombo)

Filter by Role:

All Roles

FDI / DFDI Unit

MOH Officers

Regional Directors (RD)

FCAU Admins

Q

Figure 11 Inspection Report Submission Screen If Sampling is Not Required

If Sampling is Required

Where laboratory analysis is necessary, the following process is followed:

1. Product samples are collected during the inspection.
2. Samples are submitted to the designated laboratory for testing.
3. Additional laboratory testing fees may be requested where applicable.
4. Laboratory results are received and recorded in the system.
5. The results are considered during the final assessment and approval process.

Laboratory Testing & Sample Referral Decision

Are physical salt samples collected for laboratory chemical analysis? *

☒ Yes (Dispatch Samples to Lab & Await Test Results) ☐ No (Finalize Plant Inspection Directly)

Inspection & Laboratory Workflow:
Submitting this form with samples marked will save the physical checklist as the official on-site baseline audit report and advance the product status to **Pending Lab Testing**. Sample units, batch codes, and laboratory dispatch are recorded in the Laboratory Sampling Module below.

Official Laboratory Sampling Request Form
Launch the lab sampling module for this salt product to select laboratory, record batch codes, and generate dispatch memorandum.

5. Approval Process

After completion of the inspection and any required laboratory assessments, the application proceeds through the defined approval workflow.

The approval process consists of the following stages:

1. Assistant Director review and recommendation.
2. Director review and recommendation.
3. Director General final approval.

Each approving authority reviews the application details, inspection findings, laboratory results, and supporting documentation before recording a decision.

6. Final Approval Outcome

If the Application is Approved

When all regulatory requirements have been satisfied:

1. A Registration Certificate is issued.
2. A unique Registration Number is assigned.
3. The certificate validity period is recorded.
4. The manufacturer is notified of the successful registration.

Figure 18 Approved Registration Certificate Screen

If the Application is Rejected

If the application does not satisfy the required regulatory requirements:

1. A rejection notification is issued.
2. The reasons for rejection and any observations are recorded in the system.
3. The manufacturer is notified accordingly.

7. Post-Registration Compliance Monitoring

Registered manufacturing facilities remain subject to ongoing regulatory monitoring and compliance verification.

FCAU may conduct:

- Periodic surveillance inspections
- Follow-up inspections
- Unannounced inspections
- Compliance assessments

Based on inspection outcomes, the following regulatory actions may be taken:

- Revisit Required
- Corrective Action Period Issued
- Certificate Suspension
- Certificate Cancellation
- Certificate Revocation for unresolved non-compliance

All compliance activities are recorded within the system for audit and traceability purposes.

Renewal Review and Approval

The renewal request undergoes the required review process, including:

- Payment verification
- Inspection requirements
- Compliance assessment
- Approval workflow

Upon successful approval, the registration certificate validity period is extended.

9. Amendment Process

The Amendment Process allows manufacturers to request changes to information associated with an existing registration.

Amendment Request Submission

The manufacturer submits an amendment request specifying the details to be modified.

The request may include updates such as:

- Business information
- Manufacturing facility details
- Product information
- Other registered information

Amendment Review and Approval

FCAU reviews the requested changes and determines whether further verification is required.

Where the requested amendment significantly affects the manufacturing facility or production process, an additional site inspection may be conducted.

Following review and verification:

1. The amendment request is approved or rejected.
2. The designated approving authority records the final decision.
3. Updated certificate information is issued where applicable.

10. Multi-Brand Registration

The system supports the registration of multiple brands under a single verified manufacturer profile.

Brand Registration

A registered manufacturer may add additional brands to the existing parent manufacturer registration.

For each brand:

1. Brand-specific information is maintained separately.
2. The relationship to the parent manufacturer registration is preserved.
3. Regulatory records remain traceable at both manufacturer and brand levels.

New Refined Brand Registration

Brand Approval and Certification

Where regulatory approval is granted:

1. Separate brand registrations are maintained.
2. Certificates may be issued for individual brands where required by the applicable regulations.
